

Company policy

KABELOVNA Decin Podmokly s.r.o. ranks among the leading European companies producing optical and metallic cables intended for the transmission of information and energy.

The company's management is fully aware of its leadership role and obligations with regard to quality management systems and environmental protection, following this, it announces an integrated company policy:

- The company strives to acquire and retain customers by constantly improving products and meeting customers' requirements.
- We strive to support existing customers with comprehensive care to maintain their trust.
- Continuous improvement of all processes and activities is the necessary support for these priorities.
- Monitoring aspects of the company's impact on the environment and on the health and safety of employees is a permanent part of our activity.
- The basic and minimum level is compliance with binding and other requirements related to the environment and occupational safety in connection with our activities, or company products.
- By regularly reviewing all risks of processes, production facilities, products and services, including the potential for emergency situations, we strive to prevent and minimize possible negative impacts on the environment and on the health of employees and the safety of their work.
- Current systemic and specific measures for further improvement are primarily aimed at reducing resource consumption and simultaneously increasing safety for workers in the company's production processes.
